-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 02.01.2006.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Response to Arguments

1. Applicant's arguments filed on February 1st, 2006 have been fully considered but they are not persuasive. The applicant argues that Mehta fails to teach or suggest the vibration of the tip is modulated with low frequency pulses to produce an extremely fine and precise cut in the bone tissue. Inherently the tip of Mehta when modulated with low frequency pulses it will produce an extremely fine and precise cut in the bone tissue (**see also column 1 lines 59-67**).

Therefore claim 9 is still rejected under 35 U.S.C. 103(a) as being unpatentable over Mehta (US 5,843,109) as stated in the previous office action dating October 25th, 2005.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

3. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims **12, 15 and 16** are rejected under 35 U.S.C. 103(a) as being unpatentable over Mehta et al. (US 5,843,109). **Referring to claims 12, 15 and 16**, the applicant's specification does not establish any criticality on why the instrument is used for extraction of impacted third molars in the vicinity of the dental alveolus; for vertebral laminectomy treatment; for hand and foot bone surgery and therefore considers it a matter of design choice. It would have been obvious to one of ordinary skill in the art at the time of the invention to provide an instrument that can be used for different situations, based on the teachings of Mehta (**column 1 lines 59-67**) "Hand-piece apparatus in accordance with the present invention useful for the disruption (**ie, fragmentation, eroding, sloughing off and emulsification**) and removal of unwanted material such as tissue, cartilage, bone calculi or the like from an animal body such as a human...". The usage of the instrument is based on patient criteria (**ie, hand, foot, skull, etc...**) and therefore is matter of design choice on where to use the instrument.

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
